

# "The Clean Power Revolution"

by Troy Helming

This book describes America's 1<sup>st</sup> & only "Market Driven" solution to our myopic addiction to fossil fuels: The Freedom Plan<sup>SM</sup>

## Independent Reviews:

"The Clean Power Revolution is one of the most important books I have ever read in my life. Troy Helming is a true genius. When I first met Mr. Helming, it was like meeting the Thomas Edison of the 21st Century. He brilliantly exposes our energy problems in the world and then gives real world solutions to the energy crises. If you are concerned about the quality of your life in the future then *The Clean Power Revolution* is a must read. I am so thankful that Troy took my advice and wrote this soon to be called a classic contribution to humanity." **Jack Lannom (FL), author of *People First***

"Finally a book has been written that shows the way environmental and fiscal responsibility can, and do, go hand in hand." **Sky Canyon (CO), former President & Publisher, New World Library**

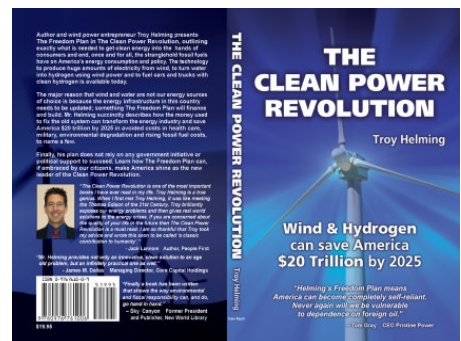

"Mr. Helming provides not only an innovative, clean solution to an age-old problem, but an infinitely practical one as well." **Jim Dallas (NY), Managing Director, Core Capital Holdings**

"A must read for anyone tired of paying too much at the pump... this book is based on a solid foundation that builds a plan to get America free from dependence on foreign oil." **Craig Andres (MO), TV News Producer**

"The Freedom Plan is mobilizing; even the most conservative Republicans will take action and switch to clean Green Power." **Jeff Eagle (KS), US Navy Submarine Force, Ret**

## Learn about The Freedom Plan<sup>SM</sup> (summarized below):

1. Completion in 10 years; Cost: \$2 Trillion; Saves the U.S. economy \$20 Trillion by 2025.
2. Completely eliminates dependence on foreign oil & dirty fossil fuels.
3. Provides \$6 Trillion+ of positive economic impact to America:
  - a. 8 - 10 Million new jobs, with 3 Million + high-wage manufacturing jobs.
  - b. Hundreds of billions of royalties paid to rural America every year where the projects are located.
  - c. Stabilizes & lowers volatile energy prices (e.g. what is the fuel cost of wind energy?)
4. The Freedom Plan<sup>SM</sup> is Self-Funding once 1 million Americans choose clean power in the form of FutureWind<sup>SM</sup> (offered by numerous organizations who have officially endorsed The Freedom Plan<sup>SM</sup>) or a similar Green Tag that is audited by Grant Thornton and supports implementation of The Freedom Plan<sup>SM</sup> (profits from that 1<sup>st</sup> phase are reinvested to fund completion).
5. Does not rely on any government subsidies, mandates, or financial support. This is a Market-Driven solution to our energy crisis. Any plan that relies on government will ultimately fail, according to Fortune Magazine (8/11/2004 "How to Kick the Oil Habit").
