Author of "The Clean Power Revolution"

## The Freedom Plan<sup>SM</sup> An Overview

"The Clean Power Revolution" is a book that describes The Freedom Plan<sup>SM</sup>, a step-by-step method to convert the USA to 100% wind, hydrogen, solar, and other renewables with existing technologies:

1. **Completion in 10 years.**
2. **Cost: \$2 Trillion.**
3. **Saves the U.S. economy \$20 Trillion** by 2025.
4. Completely eliminates dependence on **foreign oil**.
5. Completely eliminates dependence on **dirty fossil fuels** and dangerous **nuclear** energy.
6. Provides at least **\$6 Trillion of positive economic impact** to America, including:
  - a. 8 to 10 Million new jobs, with at least 3 Million being high-wage manufacturing jobs.
  - b. Hundreds of billions of wind & renewable methane royalties paid to rural America every year where most of these projects are located.
  - c. Stabilizes energy prices (what is the fuel cost of wind energy?) which would otherwise be volatile.
  - d. Lowers energy prices as more renewables are added, since the ongoing fuel & operational costs are far lower than conventional fossil and nuclear power plants.
7. The Freedom Plan<sup>SM</sup> is Self-Funding once 1 million Americans choose clean power in the form of FutureWind<sup>SM</sup> (offered by numerous organizations who have officially endorsed The Freedom Plan<sup>SM</sup>) or a similar Green Tag that is audited by Grant Thornton and supports implementation of The Freedom Plan<sup>SM</sup>. In other words, with 1 million homes on clean power, 10% of The Freedom Plan<sup>SM</sup> is built (the 1<sup>st</sup> domino falls) and the profits from that 1<sup>st</sup> phase are reinvested to fund the remaining phases to full completion.
8. **Does not rely on any government subsidies**, funding, mandates, or financial support. This is a **Market-Driven solution** to our energy crisis. Any plan that relies on government will ultimately fail, according to Fortune Magazine (8/11/2004 "How to Kick the Oil Habit").
9. Describes how the Midwest has enough wind potential to power the entire country's electric grid 8x over, or to power the grid 3x over plus make enough clean, safe **hydrogen** from water (at night during off-peak hours) to power every car & truck in America.
10. The Freedom Plan<sup>SM</sup> details how grass roots efforts, through simple endorsements of The Freedom Plan<sup>SM</sup> by organizations of all sizes, can successfully convert America to 100% clean power in 10 years.

"*The Clean Power Revolution* is one of the most important books I have ever read in my life. Troy Helming is a true genius. When I first met Troy Helming, it was like meeting the Thomas Edison of the 21st Century. Troy brilliantly exposes our energy problems in the world and then gives real world solutions to the energy crises. If you are concerned about the quality of your life in the future then *The Clean Power Revolution* is a must read. I am so thankful that Troy took my advice and wrote this soon to be called a classic contribution to humanity." Jack Lannom (FL), author of **People First**

"Finally a book has been written that shows the way environmental and fiscal responsibility can, and do, go hand in hand." Sky Canyon (CO), former President & Publisher, **New World Library**

"Mr. Helming provides not only an innovative, clean solution to an age-old problem, but an infinitely practical one as well." Jim Dallas (NY), Managing Director, **Core Capital Holdings**

"The Freedom Plan is mobilizing; even the most conservative Republicans will take action and switch to clean Green Power." Jeff Eagle (KS), **US Navy Submarine Force, Ret**

"A must read for anyone tired of paying too much at the pump... this book is based on a solid foundation that builds a plan to get America free from dependence on foreign oil." Craig Andres (MO), Professional Journalist for 2 Decades and **TV News Producer**
