

Only at Krystal Planet...complete hydrogen system

power your home & vehicles for 30 years

The Krystal Hydrogen SystemSM uses Sunlight and Wind to power your home, and makes hydrogen with the extra energy to 'store' the wind & solar power. Makes enough extra hydrogen to power up to two (2) vehicles (conversion of any gasoline or diesel engine to run on H₂ is an extra charge).

Benefits:

- **Never pay another power bill again**
- **Fuel your vehicles for FREE**
- **Clean the Air & Water**
- **Reduce Dependence on Foreign Energy**

Energy costs are at record high prices, and will likely continue rising. If you have some money to spend (this system is not cheap), want to be a leader in your community (have 'bragging rights' to be the 1st in your town to power your home and car with renewable hydrogen!), and want to protect your future from rising energy costs, this system is it. **Only 50 systems available in 2005.** Financing available (equity line or unsecured loan).

The \$150,000 Krystal Hydrogen SystemSM includes:

- 5 kW Solar PV array
- Hydrogen Electrolyzer (makes ~1 kg/day of H₂, 2 kW input – enough extra for a fuel cell + up to 2 vehicles)
- 5 kW Fuel Cell + 3600 psi hydrogen storage tank
- Power Control system & inverter, shipping, installation, 5 year warranty
- Note: solar PV system has a 25-year warranty, Electrolyzer has a 50-year warranty
- *OPTION: 3.2 kW Wind turbine + up to 70' tower added to KHS for \$10,000 plus installation*
